Wealth Confiscation and Elite Persistence: Evidence from the Great Reduction

Monir Bounadi[*] Jonatan Riberth[†]

[*]IIES, Stockholm University

[†]Research Institute of Industrial Economics

Motivation

Societies experience upheavals where established elites are stripped of their wealth:

- The French Revolution, the dissolution of the monasteries, the oprichnina, etc

Whether such losses persist determines how deeply upheavals reshape the elite.

Motivation

Societies experience upheavals where established elites are stripped of their wealth:

- The French Revolution, the dissolution of the monasteries, the oprichnina, etc

Whether such losses persist determines how deeply upheavals reshape the elite.

Research Question

How are elite families affected and how do they adapt in the long run when faced with wealth shocks?

This Paper

Question

- How are elite families affected and how do they adapt to wealth shocks?

Setting

- The Great Reduction of 1680, Sweden's largest wealth shock

Data

- New genealogical data on universe of noble families spanning three centuries

Results

- Effects of wealth shock persist across generations
  - Estimates in lines with intergenerational correlations in wealth
  - Regression to the mean implies limited effects over the very long-run

Outline

Historical context

Nobility of Sweden

Historical manors in Sweden and Finland

Directly affected individuals

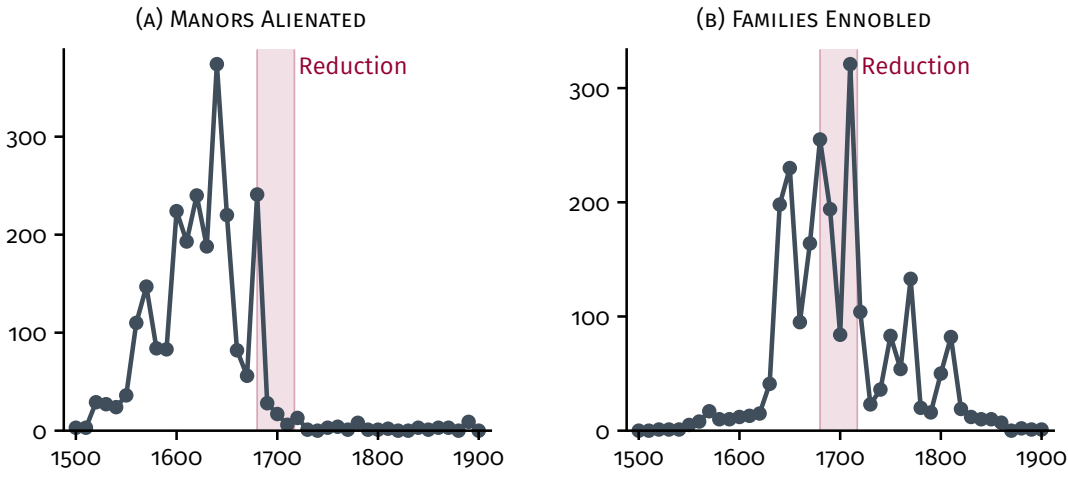

Descendants of affected individuals

Conclusion

Background: Policy of Enfeoffment, 1580–1680

- In the 1600s, Sweden funded its military campaigns by granting fiefs to the nobility
- The nobility gradually gained economic and political power from 1580 to 1680

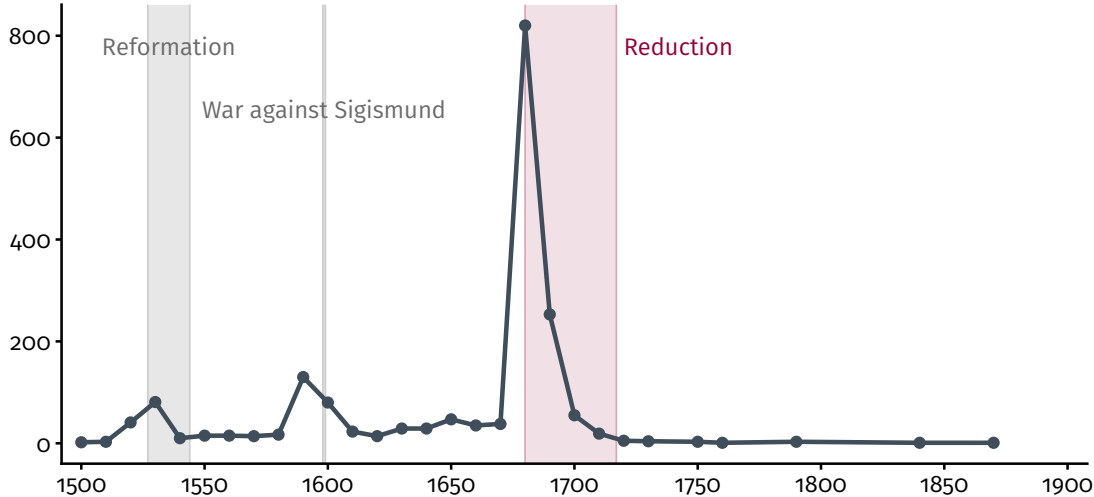

Manors alienated and families ennobled, 1500–1900

Great Reduction

- In 1680, backed by peasants, clergy, and burghers, Charles XI launched the **Great Reduction**
  - The Crown confiscated half of noble land
  - The Privy Council was dissolved and the Riksdag subordinated

Manors Confiscated

Distribution of Land in Sweden, 1520–1885

	Cadastral category			
Year	Noble	Ecclesiastical	Crown	Freehold
1520	25	25	6	45
1560	23		30	47
1654	65			
1700	33		35	32
1750	33			
1825	33		13	54
1878	32		8	60
1885	33		8	59

Estimates based on Myrdal (1996), Nilsson (1958), Gadd (2020), and Lindgren (2021).

Data

Data

We combine two sources spanning the 15th to the early 20th century:

Data

We combine two sources spanning the 15th to the early 20th century:

- **Nobility of Sweden** (House of Nobility, 2026)
  - Full-count vital and biographical data on 120K noble individuals
  - Example: De la Gardie

Data

We combine two sources spanning the 15th to the early 20th century:

- **Nobility of Sweden** (House of Nobility, 2026)
  - Full-count vital and biographical data on 120K noble individuals
  - Example: De la Gardie
- **Historical Manors in Sweden and Finland** (Ulväng, 2026)
  - Ownership records (type, location, owner, etc.) on 15.7K manors
  - Example: Läckö Castle

Data

We combine two sources spanning the 15th to the early 20th century:

- **Nobility of Sweden** (House of Nobility, 2026)
  - Full-count vital and biographical data on 120K noble individuals
  - Example: De la Gardie
- **Historical Manors in Sweden and Finland** (Ulväng, 2026)
  - Ownership records (type, location, owner, etc.) on 15.7K manors
  - Example: Läckö Castle
- **Manors of the Nobility of Sweden** (authors' dataset)
  - String matching, with an LLM resolving ties (validated on a large manually matched sample)

Nobility of Sweden

Based on House of Nobility's **Minerva** released earlier this year.

- **Full count** of Swedish nobility from the 15th to the early 20th century
  - **139,000 individuals** in 2,885 families, including 30,000 title-bearing fathers
- **Biographies** with census-like information
  - LLMs extract occupation, demographic information, partners, and more
- **Exact genealogical links** connect parents and children across generations

Extracting Key Variables Using LLMs

TAB 2

Johan De la Gardie (son av Pontus, friherre De la Gardie, Tab. 1), friherre till Ekholmen, herre till Kjulaholm och Rasik samt Kåreholm i Röne kapellförsaml. Östergötlands län. Född 1582-05-03 i Reval. Erhöll stadfästelse på friherrskapet Ekholmen av konung Sigismund 1594-01-01 (1/6). Ståthållare på Åbo slott och över dess län 1611-09-15. Förordnad att rannsaka och avdöma klagomål mot ståthållare, lagläsare och länsmän i Finland 1614-06-07. Erhöll donation på gods i Satakunda s. å. Ståthållare över Tavastehus län 1616-05-16. Introd. 1625 bland friherrar under nr 4. Guvernör på Reval och över Estland 1626-03-06. Lantmarskalk vid 1630 års riksdag. Landshövding över Uppland 1631. Generalståthållare på Stockholms och Uppsala slott med dess underlydande län 1632. Riksråd 1633-02-04. Hovrättsråd i Svea hovrätt 1634-12-18. Död 1640-03-10 på Steninge i Husby socken, Uppsala län utan söner och slöt således på svärdssidan frih. ätten De la Gardie, samt begraven s. å. 12/7 i Veckholms kyrka. […] Gift 1:o 16(09) med friherrinnan **Catharina Oxenstierna**, begraven 1625-03-06 i Björkviks kyrka Södermanlands län […]. Gift 2:o 1635-12-13 i Stockholm med **Görvel Posse** […].

Catharina	Oxenstierna	1609
Görvel	Posse	1635

Historical Manors in Sweden and Finland

- The most comprehensive database of Swedish and Finnish historical manors:
  - 15.7K manors and 130K property events, recording owners, locations, and tenure
  - Includes all:
    - Manors named by Elgenstierna (1925–1936)
    - Manors in Almquist (1931–1976), covering 41% of Swedish taxable land in 1700
- Supplement with **Heraldica** National Archives of Finland
  - 3% of manors in regression sample.

Linking manors to noble individuals

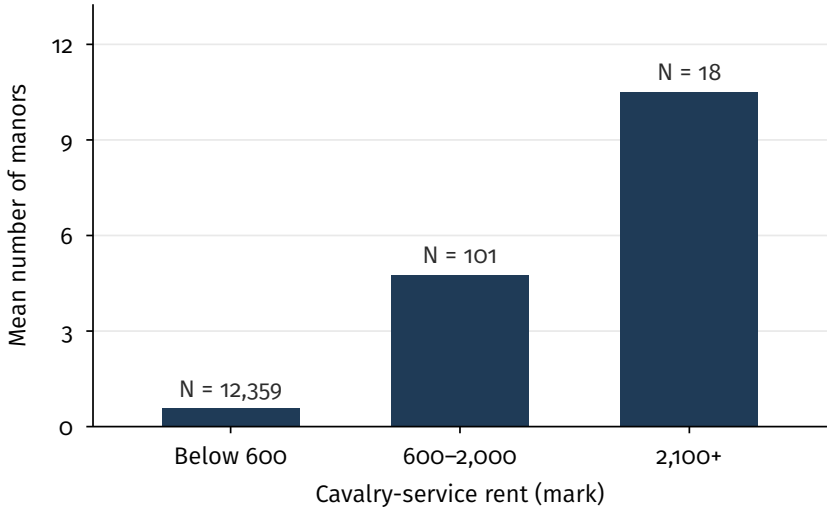

- Generate candidate matches from names and ownership periods
- Use an LLM to resolve candidates from passages and ownership sequences

⇒ F1 rises from 0.75 to 0.81 in manually linked sample of all **confiscated** manors

  - Precision: share of proposed links that are correct
  - Recall: share of correct links that are found

F1: harmonic mean of precision and recall

More manors, **higher cavalry-service rent** (nobles in 1655 & 1697)

More manors, **higher taxes** in 1613

Occupation inferred

N=287 noblemen linked to the 1613 Älvsborg ransom list. 32 riksdaler per cavalry horse owed

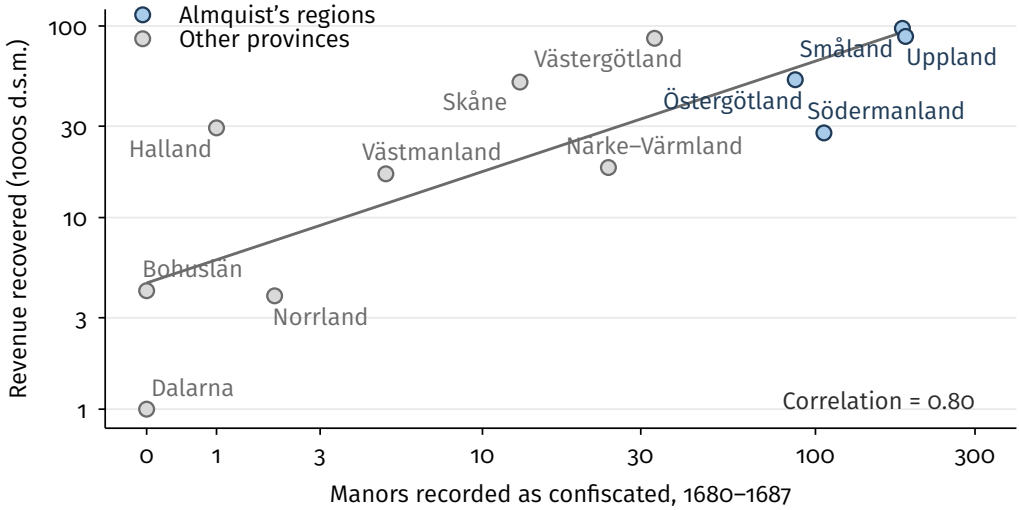

Identifying affected nobles

1. Find a manor confiscated by the Crown between 1680 and 1717
2. Identify its last *observed* owner before confiscation

This gives us:

- **355** affected nobles in the first-stage sample, of which **307** have observed descendants
- **Example:** Magnus Gabriel De la Gardie lost 12 manors, the most in the sample

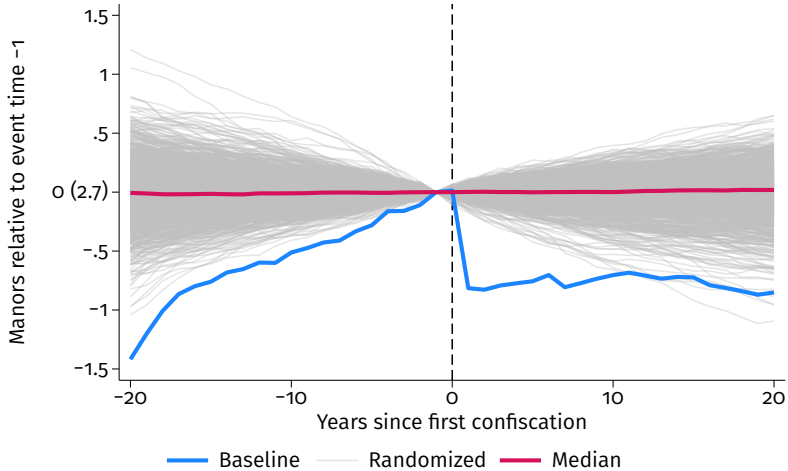

More manors confiscated, **more annual revenue recovered**

Provinces of present-day Sweden, revenue recovered by the Crown (Svedelius, 1849–1851). Log scales

Results

Confiscation cut manor holdings by **30%**, with no recovery

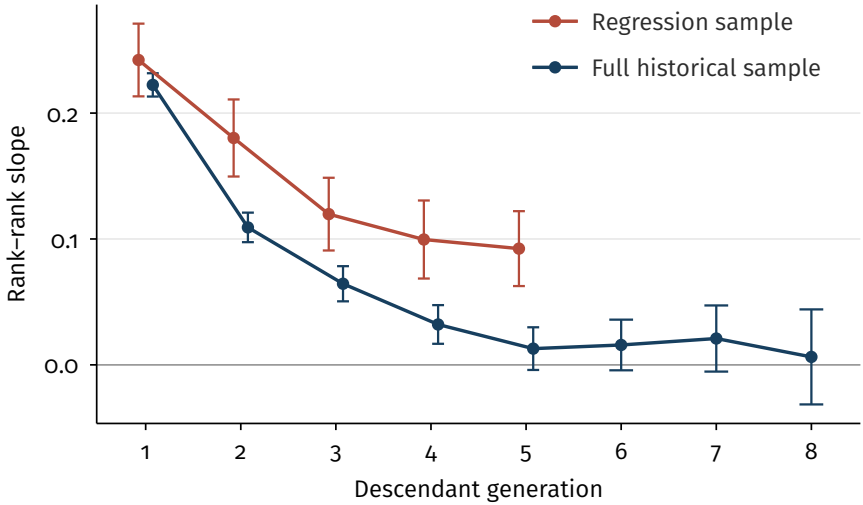

Holdings averaged 2.7 manors the year before confiscation. Gray lines: 1,000 placebo assignments

Effects on descendant wealth

				Affected		
Generation	Observations	(1)	(2)	(3)	(4)	(5)
1 (Children)	3,522	−1.88 (1.38)	−3.80 (1.32)	−2.70 (1.29)	−3.22 (1.31)	−3.23 (1.31)
2 (Grandchildren)	3,386	−0.39 (1.39)	−1.43 (1.36)	−0.70 (1.39)	−1.13 (1.39)	−1.21 (1.38)
3	3,535	−0.42 (1.39)	−1.49 (1.42)	−0.29 (1.34)	−1.06 (1.27)	−1.05 (1.27)
4	3,574	−1.08 (1.29)	−2.53 (1.41)	−1.53 (1.25)	−2.10 (1.24)	−2.20 (1.24)
5	3,322	−0.17 (1.46)	−1.07 (1.44)	0.08 (1.40)	−0.15 (1.39)	−0.07 (1.40)
Index father's rank pre-1680			✓	✓	✓	✓
Index father's birth-decade FEs				✓	✓	✓
Index father's high nobility pre-1680					✓	✓
Index grandfather's rank pre-1680						✓

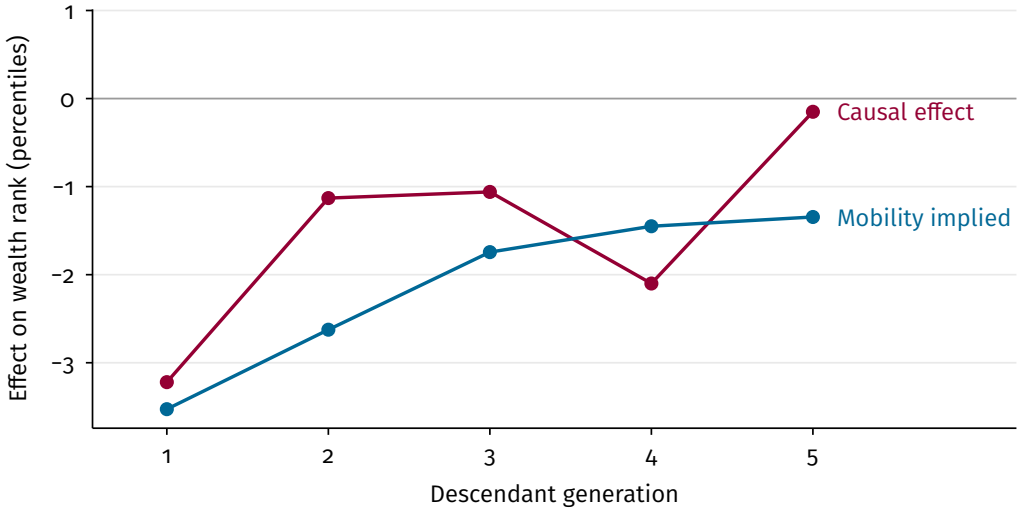

Notes: Descendants are ranked on manors within their generation. Confiscation lowered affected index fathers' rank by 14.6 percentiles on average. Standard errors are clustered by lineage.

The relationship between ancestral and descendant wealth fades slowly

Wealth ranked within generation. Bars show 95% confidence intervals

Causal and mobility-implied wealth effects

Mobility-implied effects: initial wealth shock × intergenerational correlations. **Causal effects:** column (4) of the table

Conclusion

- **Economic history of the Great Reduction**
  - The Reduction affected nobles of all ranks
  - Those affected were united by having benefited from the policy of enfeoffment
  - Little evidence that the Reduction targeted Charles XI's political enemies
- **Long-run Inequality**
  - Wealth is highly correlated across generations
  - Evidence that these correlations partly reflect causal transmission of wealth
  - No evidence of compensating adjustments along other socioeconomic margins

Contribution

- **Effects of large wealth shocks** (Ager, Boustan, and Eriksson, 2021; Bleakley and Ferrie, 2016)
  - ↪ Consider political and social outcomes as well as role of social networks
- **Intergenerational mobility in the very long run** (Barone and Mocetti, 2021; Clark, 2014)
  - ↪ Estimates from **exact genealogical links** spanning three centuries
- **Persistence of elite through revolutions** (Alesina et al., 2020; Bukowski et al., 2022)
  - ↪ More specific measurements of individual responses
- **Economic history of the Great Reduction and the Swedish nobility** (Bengtsson et al., 2019; Heckscher, 1935–1936; Prytz, 2013; Svedelius, 1849–1851)
  - ↪ First estimates of the individual-level impact of the Great Reduction on the nobility

Ownership of confiscated noble manors c. 1750

Owner in the record closest to 1750, between 1730 and 1770

Historical Context

Confiscated Properties: Examples

The 1680—1682 Riksdag of Estates decreed confiscation of these properties:

- **Countships and baronies.** Properties granted from 1560 until the Great Reduction, when all were revoked without exception
- **Norrköping decree fiefs.** Properties granted after 1604 with inheritance restrictions; allowed families to retain rents up to 600 silver daler and decide which fiefs to transfer
- **Conquered territories.** Properties granted in territories conquered in the 17th century, including former Danish lands and Livonia (Lithuania and Latvia)

Historical Context

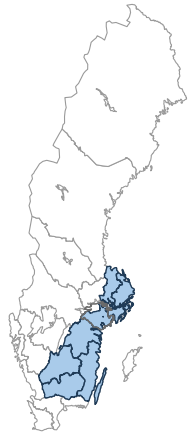

Great Reduction

The Reduction specifically targeted the manors that had been alienated (i.e., granted):

> *But with the allodial donations, the same situation arose as with the Norrköping resolution estates, namely that some had been transferred through purchase from man to man. […] The Reduction commission did not know where to find the sellers, nor whether they still owned the estates, how large they were, or where they were located.*
>
> — *Svedelius (1849–1851), translated from Swedish*

Almquist's regions

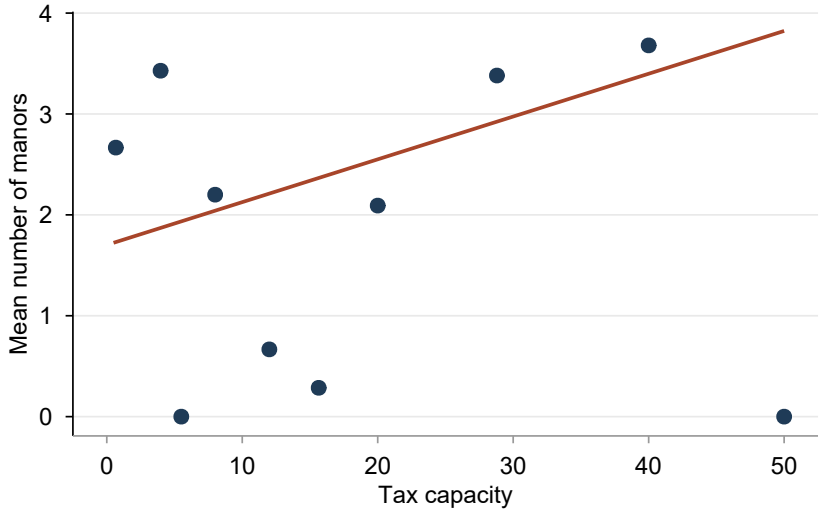

- Covers 41% of taxable land in present-day Sweden in 1700
- Covers 52% of the value of manorial holdings confiscated in Sweden in the Great Reduction

Regions covered by Almquist (1931–1976)

‹ Back
